

JOHN R. BORCHERT MAP LIBRARY

Historic City Maps

For a volume with more than one map, if the map itself doesn't list a year, the year of publication of the volume is given. If a volume has multiple maps, and some of them have years listed that differ from the overall year of publication, any maps in that volume without a year are listed below with the year of publication followed by a ? symbol. For historical maps, the year field refers to the timeframe depicted by the map, rather than the copyright/publication year. For some atlases where the library has multiple editions, there may possibly be some repetition of maps, or only slight differences. Inset maps are noted as such, and are in general less detailed and cover a smaller area compared to full or multi page maps.

LD low detail (small scale, no/few labeled streets), ptl partial coverage, repro reproduction, qtr quarter page, hlf half page
Sorted by country, city, and year (in that order).
